

Bronze Peacock has been desperately trying to match the competitive price and aftersales service of Salim Auto. So, out of desperation and jealousy, Bronze Peacock manifested its dirty marketing on Facebook against Salim Auto.

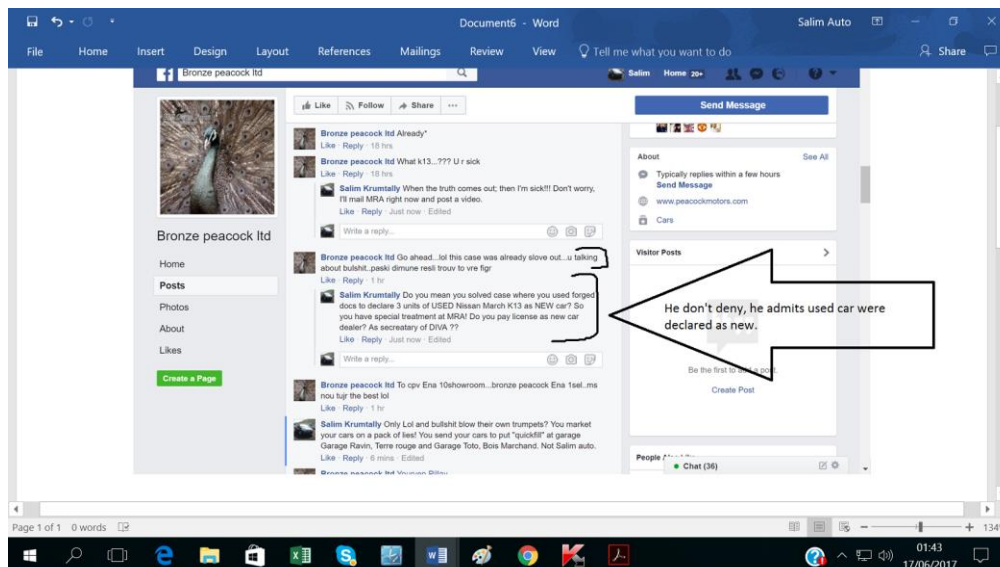

False and baseless campaign by secretary of DIVA. This is his whole day language.

We've offered Rs 1,000,000 to prove one car which we clock back mileage or imported as accident car. **Don't run away Peacock. PROVE IT !!!**

Why cars of Peacock go to Garage Toto of Bois Marchand & Garage Ravin of Terre rouge? To put "quickfill"?

Peacock imported 3 used car and declared as new, **there is use of forged documents.**

He don't deny, he admits used car were declared as new.

Its very easy for the MRA and the CCID to investigate on these used cars declared as new; and to establish forgery & making use of forged documents:

1/ the BL (bill of lading) of a used car dealer for a car shipped in Japan will never mention New car. For the BL to mention New Car, it must be forged. Only new car dealer's BL mentions New Car. and

2/ the Land transport Bureau of Japan can certify that these cars were registered in Japan, so they are used cars.

Mahacar also declared many used car as new car including Toyota Premio NZT260-3154039 which was registered as Nov 2014 in Japan but declared as new in Mauritius, registration number is 1056 Feb 15.

What these used car dealers have been doing with auction sheets of used cars?

The auction sheet is a very important document. At the time the car was sold in auction house; it states the mileage; the auction grade including whether the car was accident or not; parts that were changed; dents and scratches, etc.
